

## **StarForce FrontLine Video**

**Protection solution for video files  
against home copying  
and unauthorized use**

*«StarForce» company  
is a recognized expert in the field of protection  
of games, educational, entertaining  
and business software*

## StarForce FrontLine Video

SF FrontLine Video solution provides protection against piracy and unauthorized use of stream video files (.avi, .mpg, .wmv, etc.), intended to be viewed on a personal computer.

This solution from StarForce helps you protect the results of your work, professional and personal activity, so that you can use them according to their purpose without problems and fear.

Thus, if you are concerned about the *confidentiality and authorship of the files which are a part of your professional activity*, by protecting them you can easily send them to your partners, clients, customers, contractors, in short, you can freely distribute videos without anxiety that someone can use them to his purpose without your knowledge.

If it is important for you to get protected against unwanted attention of those who have access to your computer at home or at work, you can protect your files using SF FrontLine Video and forget about such worries.

### ***SF FrontLine Video is designed to protect the following types of video files:***

- educational/training video courses
- video trainings for sale, records of trainings and seminars your company conducts
- advertising and popular science videos
- records of corporate events (holidays, rewards, presentations of awards, team building activities, etc.)
- records of important negotiations and meetings
- manuals, textbooks
- amateur filming (author videos)  
and many other videos

Viewing protected video files is performed by using a video player specially developed by StarForce. The player provides convenient review of the protected video for an end user, and is an integral part of the protection.

### ***SF FrontLine Video advantages:***

- Protection against your intellectual property theft
- Protection against unauthorized distribution and review
- No restrictions on distribution of protected files  
You can pass/transfer them on any available media and via the Internet
- No special equipment is required to implement protection
- Video player interface customization
- Possibility to get acquainted with the protection in test mode
- 24/7 StarForce professional customer support

### **Additional advantages in case of commercial use and distribution of protected files:**

- Possibility to control distribution
- Different methods for an end user to activate the protected application
  - via SMS, Internet, phone, fax – when distributing via the Internet
  - with or without the input of a disc key – when distributing on discs
- Possibility to place your ads in video player

**SF FrontLine Video – protection of your intellectual property and confidentiality!**

## Protection and distribution of protected video files

Two versions of file protection are available: with disc binding and with binding to computer.

### ***Binding video to disc:***

Using this binding type you can distribute, transfer, pass and sell your video on the selected media (CD/DVD/CD-R/DVD-R). Protected video can be only viewed if a disc is in the drive either permanently or periodically, which ensures protection against unauthorized distribution and confirms legal file usage.

Activation of a file is necessary for the first review and further work with the file. Activation is possible either with the input of a disc key or without it (depending on the parameters you selected).

### ***Binding video to computer:***

This type of binding implies any type of video distribution (on a media as well as via the Internet).

Video file activation is necessary for the first use of the file. The activation can be performed using various means: Internet, SMS, phone, email. After the activation is complete, the application binds to computer, and its further use is only possible on that computer.

In case of using this binding type, when distributing on optical media it is possible to transfer a protected video file to another person to view it on another computer. But to successfully run and view the file on another computer it is necessary to reactivate the file (i.e. to buy a Serial Number for it). Thus, not only the usage legality is ensured, but also the media becomes an additional distribution channel when necessary.

## System requirements

### **Requirements for the protected application operation (video player):**

- Operating system:
  - when using 3.07 protection system version: Windows 98/ME/2000/XP/2003/Vista
  - later than 3.07: Windows 2000/XP/2003/Vista
- Video codecs required for protected video files playback (it depends on the type of video files to be protected)

### **Requirements for the system to perform protection:**

- Operating system: Windows 2000/XP/2003/Vista
- .NET Framework 1.1
- Internet and open TCP port 27705 to connect to the protection server.

*Attention! DVD Video protection is not supported.*

*StarForce has also developed **solutions to protect documents and information** in pdf, .doc, .rtf, and other formats. Contact StarForce sales managers for details.*
